

GDPS Metro Global – GM Workshop

WELCOME TO THE GDPS MGM4SITE WORKSHOP

Instructor and Class Introductions

Tell us about yourself
and your GDPS
experience

* and *

the one thing you'd
most like to learn about
GDPS Metro Global –
GM this week

Workshop Objectives

- During this workshop you will
 - Understand the overall GDPS MGM solution with focus on selected implementation aspects
 - Understand the GDPS MGM processing scenarios
 - Have hands-on experience writing scripts and executing GDPS MGM procedures
- ✗ We do not teach PPRC or Global Mirror, knowledge of the replication technology is assumed
- ✗ We do not teach Sysplex, NetView or System Automation
- ✗ We do not teach the GDPS MGM implementation or customization in any detail
- With the skills you acquire during this workshop, you should be able to
 - Handle different HA/DR scenarios with GDPS MGM
 - Understand the tasks GDPS performs during the recovery processes
 - Apply the experience to your or your client's environment

Workshop environment

- The main focus of this workshop is on the MGM 4-site IR configuration
- There is assumed familiarity with GDPS Metro and Global – GM topologies

Agenda – timings are approximate!
